## 10 year Anniversary Celebration

### **“FREE” take-home teeth whitening for you and your friends**

Dear Friends,

It was 10 years ago that Dr. Michael Schneider extended to me his welcoming arms and brought me in front of all of you. Now that I know that I have not disappointed you, I would like to take this moment to thank each and every one of you for your love and trust in me and my wonderful staff members.

Needless to say Dentistry has been *far* more than a manner of support, for me. It has been my life, my passion and my hobby. My passion has always been the pursuit of the highest level of technical excellence-- and, subsequently **the highest standard of care that I've been consistently delivering to you.** Within the past 10 years, I have introduced to you many different technologies. To name a few:

*Digital X-ray:* We all understand X-ray is the No. 1 necessary evil, without it we simply can't see anything behind the curtains. Digital X-rays minimizes your exposure to radiation by 10X's.

*CEREC™:* Digital crown making process; many of you have had the pleasure of getting a tooth colored crown during the same visit, without any impressions. This means that you no longer have to take another day off work or worry about the embarrassing moment of a loose temporary crown. Personally, I really enjoy the tight fit and wonderful aesthetics that I can provide. As a matter of fact, I have decided to become one of 23 CEREC certified instructors nationwide. My goal is to get every Dentist in our world to use CEREC. Yes, it's that good.

*Invisalign™:* Some call it invisible braces. I call it another miracle. My cousin had suffered from a poor gum conditions for 50+ years. This was not a result in lack of home care, but because her teeth were crowded. I asked her to get braces for many years, and she told me she's too old to wear that ugly black thing. With Invisalign, no one can tell she was wearing it. Now 5 years later, we have eliminated her gum disease, and she is very happy with her smile.

*Laser:* There are many applications for laser. It can help to create a better smile-line painlessly; remove unwanted gum painlessly; correct labial frenum; correct tongue-tie; eliminate recurrence of canker sores; eliminate stubborn periodontal disease pockets.

*Zoom™ (now Boost™):* These systems provide the quickest way to beautiful white teeth. Zoom has been the premier way of whitening your teeth. In the past 10 years, Zoom had three upgrades, and each provided better results. Boost is a value alternative to Zoom. Boost can deliver good results in as little as two 20 minute sessions.

Making you smile is what I've always enjoyed, and in these past 10 years I have constructed quite a few long lasting smiles. To celebrate our 10<sup>th</sup> year anniversary, and my 15+ years in Dentistry, I would like to give you a very special gift. The gift of A Beautiful Smile. Your gift is a free Take-Home Teeth Whitening Starter Kit (\$385 in value) for you and all of your friends and family members you refer. Some limitations may apply. Please give Helen a call to setup a consultation appointment.

Again, thanks for placing trust in me, and all those wonderful reviews online.

  
David Jin DDS
